René Doháň

Software Developer

2005 – Present

Crafting elegant solutions through engineering and design.

I love building and refining software. Originally from Slovakia, I now work remotely from around the globe. Since 2005, I've progressed from desktop applications to web and server projects, and today I focus on mobile development.

My interest in computers began at age 12 on a PMD 85, where I first explored BASIC programming. My first personal computer was an Atari 1024 STFM, notable for its graphical interface. At 15, I built and tinkered with a 386SX—learning hardware, BIOS, and firmware—before diving into Turbo Assembler and Pascal. My inaugural program was a simple self-replicating routine, which, in hindsight, was my first taste of software engineering thrill.

Initially, I worked hands-on with hardware—assembling desktops, installing software, setting up networks, and performing technical support. I then transitioned to web development, crafting sites and browser games with JavaScript and PHP. In 2004, I created "5 in a Row" (Gomoku) for Sony Ericsson J2ME, which led to an introduction at QualityUnit and the launch of my professional development career.

Renetik Software
Developer for music production apps
December 2023 – April 2024

- Native Android apps focused on live audio recording and processing
- Mix & FxRack Apps Audio apps for android

Bioling
iOS Developer (via Sequenex team)
September 2022 – December 2023

- Development of native iOS apps, SDKs, and medical device integration
- Development of sdk and apps for Bioling iOS and Android SDK for medical devices, specifically designed for glucose scanning

Sensoneo
Full-stack Developer
March 2022 – Present

- Android app development, .NET backend, SQL database
- Sensoneo OLO Passport App, Server API, DB Electronic waste collection system

Renetik Instruments
Full-cycle Product Developer
March 2021 – April 2022

- End-to-end development of Android apps, website, graphics, and design
- Renetik Instruments Music Production Android Apps & Website

SODB 2021
Lead Mobile Developer (via Plaut / Bowbook)
July 2020 – March 2021

- Android & iOS apps for national census
- For SODB 2021
  Android & iOS apps Census of Republic of Slovakia, native mobile applications iOS & Android

Renetik Software
Frontend Developer
2019 – 2020

- Native mobile and web development with backend support as needed
- Charts for Bot Media Configurable Vue.js chart component using chart.js and written in typescript
- Om Writer Android app in Kotlin, released as first application by Renetik Software

T Johnson Marketing
Freelance Developer
2018 – 2019

- Mobile, web, and backend development
- Hand Writer Android app in Kotlin, web in Vue.js (Typescript), backend developed with Firebase
- Property Farmer Android app in Kotlin, Amazon S3 storage, Spring backend hosted on Heroku

Moto portal s.r.o.
iOS Developer
2017 – 2020

- iPhone & iPad app development for Motorkari.cz
- Motorkari iPhone and iPad app originally in Objective-C, now rewritten to Swift

Bowbook, s.r.o.
Mobile Applications Developer
2014 – 2021

- Development of Rcherz suite: iOS, Android, and Scoring apps
- Rcherz iOS big iPhone / iPad app written in Objective-C
- Rcherz Android large Android application written in Java
- Rcherz Scoring mission critical app for Android used for scoring competitions

Renetik Software
Independent Developer
2011 – 2016

- Development of iOS/Android libraries and hobby apps
- Renetik Android Software library written in Kotlin used as base for my professional projects
- Renetik iOS Software library in Objective-C and Swift, used in my professional projects
- Force Quit Small desktop application for MacOS written in objective-c

TRIAD Advertising s.r.o.
Mobile Applications Developer
2011 – 2014

- Development of diverse Android and iOS applications
- Promile Lady Android app for testing of alcohol level after some drinks, styled for woman
- Pilsner & Kozel Compass iPhone app for finding closest bar for specific beer brand
- TV Markiza Archiv iPhone and iPad app for TV Markiza

Various Clients
Freelance Developer
2010 – 2013

- iOS and Android app development
- Live Agent Mobile Two apps, one for Android and other for iPhone/iPad
- Post Affiliate Pro Mobile Two applications, for iPhone and Android, for Quality Unit
- Taxicar Two Android native applications in Java similar to Uber app, that did'nt exist back then.
- Regiofood Android as well as iPhone and iPad applications in Java and Objective-C respectively

QualityUnit
Senior Developer
2008 – 2010

- Full-stack development on SaaS and desktop tools
- Agile team development (Scrum, TDD, pair programming)
- Web app: Live Agent Pro – GWT, PHP, JavaScript, MVP
- PDF parser/generator in PHP (Adobe PDF spec)
- Maintenance of Aff Notify, Unit Miner Studio

Half-Pixel Studio
Java Developer
2008

- PDF Viewer app for magazine publisher
- Java (Swing), PHP, PDF libraries

QualityUnit
Junior Developer
2005 – 2008

- Java and C# desktop applications
- Unit Miner script editor (Eclipse RCP)
- J2EE web apps (JSF)
- OCR app in C# for U.S. client
- Wireframe editor (cancelled)

Slovak Technical University, Bratislava
Student
2001 – 2005

- Bachelor's Degree in Computer Software Engineering
- Bachelor's degree

MOVYS, a.s.
Technician & Web Administrator
2000 – 2001

- Telecommunications company
- HTML, Linux, wireless networks; systems setup and installation

University of Architecture, Bratislava
PC Administrator
1999 – 2000

- IT support for architectural computing
- Windows, AutoCAD, networking, Linux

Marsoft Computer s.r.o.
Technician & Sales
1997 – 1999

- Computer assembly, software installation, and customer service
- Hands-on experience with hardware, networking, and retail support
